

Chemours Quality Policy

At Chemours, we will deliver high-quality products and solutions to global challenges through trusted chemistry.

We are committed to meeting or exceeding customer and stakeholder expectations while acting responsibly. We achieve this by upholding our Chemours values, fostering partnerships, and continuously improving.

We focus on:

Customer satisfaction

Using advanced science and efficient processes to deliver value to customers and society.

Quality culture

Cultivating teamwork and clarity so employees understand their roles in delivering outstanding products, service, and innovation.

Risk and Opportunity Management

Identifying and reducing risk to protect stakeholders and solve problems in a changing world.

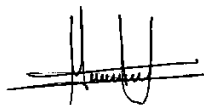

Quality Management Systems

Continually improve our quality management systems to meet recognized standards and ensure our products and services comply with our customers, regulatory, statutory, and industry requirements.

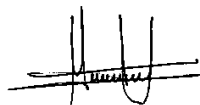

We hold ourselves accountably to this policy and expect the same from our partners (suppliers, contractors, and external providers).
